

Bachelor of Arts in Landscape Studies (園境學文學士)

Programme Code and Abbreviated Title	6028 BA(LS)
Duration of Study	3 years
Short Description	<p>The Bachelor of Arts in Landscape Studies program provides a comprehensive, multidisciplinary education in landscape architecture. It is designed to equip students with core knowledge and technical competencies in the arts and sciences of landscape architecture.</p> <p>The courses offered in the BA(LS) program include both practical and theoretical studies in: landscape design; landscape architectural history; ecology & landscape sciences; horticulture, planting design; strategic landscape planning; construction technology; and related techniques in visual communication and digital technology. In addition, a wide range of elective courses are offered to students including advanced topics in landscape architecture, as well as courses from architecture, urban design and planning.</p> <p>Through all its courses, the Division of Landscape Architecture emphasizes the Faculty's commitment to sustainable development through respect for the natural environment; culture; and society, and to the intelligent use of materials and technologies in the creation of places for people that have identity, vibrancy and diversity. We stress that design solutions should be created within a sound theoretical framework and should be sensitive to their context.</p> <p>The BA(LS) degree includes a Minor in Environmental Sustainability. The minor is comprised of selected core courses of the curriculum.</p> <p>Undergraduate students are encouraged to carry out research projects and participate in the Faculty's overseas field trips, community workshops, and exchange programs with overseas institutions. The BA(LS) is closely integrated with the Faculty's Bachelor of Arts in Architectural Studies BA(AS) program, so as to provide a common design education for all undergraduate landscape architecture and architecture students.</p>
